

IDEAL LIFE Body Manager Plus™

- Easy To Use
- Does not require a PC
- Real-time reporting of information
- Two way communication built in*
- Weight Capacity 500 lbs (227 kg)
- Multi-Language
- Non-Slip Surface

The IDEAL LIFE Body Manager Plus™ is designed for both weight-conscious individuals and those with heart conditions. It's a bodyweight scale that measures weight and automatically stores and sends the information to a user's healthcare team.

Sudden weight gain for heart patients is a warning sign of problems that can lead to emergency room visits and even hospital admission. Daily monitoring with the IDEAL LIFE Body Manager Plus™ can detect weight fluctuations and alert a healthcare team to intervene before serious problems develop.

IDEAL LIFE's program has been proven to reduce hospital re-admissions by 57%.

Obese patients often face compliance challenges or lack the mobility to attend support groups, doctor visits, or weight-loss programs. The IDEAL LIFE Body Manager Plus™ also facilitates two-way communication between patients and providers, such as motivational text messages or nutritional tips. With IDEAL LIFE, individuals can experience all the benefits of a personal health and wellness coach or a weight-loss support group without ever leaving the comfort of their own home.

*When used with IDEAL LIFE Pod™ (sold separately) for use with IDEAL LIFE Health Management System™

HOW IT WORKS

1

Kiosk

IDEAL LIFE Pod™

Mobile phone

2

Weight Reading

3

Healthcare team, family members and individual users

1 Select Your Communication Gateway

- With in-home access to a landline or the internet, use the IDEAL LIFE Pod™ for communication with any of IDEAL LIFE's wireless devices.
- Without in-home access to a landline or the internet, use cellular connectivity.
- For easy, on-the-go use the IDEAL LIFE App™, IDEAL LIFE Health Tablet™ and IDEAL LIFE Kiosk™ can all be used.

2 Take a reading

- Information will be automatically saved and transmitted to a secure information management system.
- No need for a personal computer, cumbersome wires or manual data entry.

3 Receive Feedback from Caregivers

- A healthcare team, which may include physicians, nurses and/or family members, can access the readings and assist with healthcare decisions.
